Frontend Developer with 6+ years of experience building high-performance, responsive, and SEO-optimized web applications using Next.js, JavaScript, HTML, CSS, and WordPress. Experienced in developing reusable frontend components, implementing Headless CMS architectures, optimizing Core Web Vitals, and delivering pixel-perfect user interfaces. Strong background in collaborating with cross-functional teams to build scalable digital experiences.

Experience

SaaS Labs Software - Senior SDE Web
March 2023 - Present **(3 years 3 months)**

Description

- Developed high-performance, responsive web applications and landing pages using HTML, CSS, JavaScript, Next.js, and WordPress.
- Built highly reusable and scalable frontend components using Next.js, leveraging WordPress as a headless CMS to deliver dynamic, content-driven web applications.
- Implemented pixel-perfect, SEO-friendly, and mobile-first user interfaces, ensuring cross-browser compatibility and optimal user experience.
- Optimized website performance, security, and maintainability through code optimization, regular audits, and industry best practices.
- Collaborated closely with designers, marketers, and cross-functional stakeholders to deliver high-quality web solutions aligned with business objectives.

iOSys Software India - Front End Developer
September 2019 - March 2023 **(3 years 7 months)**

Description

- Developed responsive and interactive web pages using HTML, CSS, and JavaScript.
- Built and customized WordPress websites and high-converting landing pages based on business requirements.
- Led team coordination, task delegation, and project management to ensure timely delivery of web projects.
- Managed website hosting, server configurations, and seamless website migrations across platforms including cPanel, WP Engine, GoDaddy, and Nestify.
